SKILLS

FRONTEND

- HTML5
- CSS3
- SCSS
- JavaScript
- TypeScript
- React
- Vue
- Nuxt
- React Router
- React Query
- Redux
- Redux Toolkit
- Zustand
- MUI
- Bootstrap
- Tailwind CSS

BACKEND & CMS

- Node.js
- Express
- PHP
- Joomla 5
- C#
- .NET
- MongoDB
- MySQL
- SQL

ABOUT ME

Junior Frontend Developer focused on building responsive, maintainable and user-friendly web applications using React, TypeScript and modern frontend tools. Experienced in supporting commercial client projects, implementing UI changes, fixing bugs, creating reusable components and working with existing codebases. Worked on frontend implementation for React, Vue/Nuxt and Joomla-based projects. Comfortable working with Figma designs, REST APIs and AI-assisted development workflows using ChatGPT, Codex and MCP Figma. Motivated to grow as a frontend developer, with a strong self-learning background, attention to detail and the ability to quickly adapt to new technologies and project requirements.

WORK EXPERIENCE

Dharsa / Seraaq 09.2025 - PRESENT
Junior Frontend Developer

- Worked on commercial client projects, supporting frontend development, maintenance and implementation of new features.
- Built and maintained responsive user interfaces using React, TypeScript, Vue/Nuxt, JavaScript, HTML, CSS/SCSS and MUI.
- Developed frontend parts of an e-commerce project based on React and WordPress/WooCommerce backend integration.
- Integrated frontend views with backend data and API-driven content.
- Supported multilingual frontend implementation and content structure.
- Supported the migration of the New House platform from PHP-based views to a modern React and TypeScript frontend.
- Implemented frontend changes for BimmerTech using Vue/Nuxt, including updates prepared for the Black Friday campaign.
- Worked on UDT Joomla 5 development, including template setup, module creation, custom fields, layouts, overrides and subpage implementation.
- Supported NIFC-related projects by implementing smaller frontend fixes, UI adjustments and content updates.
- Worked with Figma designs and used Git-based workflows in commercial project environments.

Rewizor Sp. z o.o. 3 MONTH INTERSHIP
Frontend Developer Intern

- Built and updated website sections using HTML, CSS, JavaScript and frontend technologies.
- Implemented new functionalities and improved existing website layouts.
- Content updates and responsive design improvements. Gained practical experience in working with real projects

TOOLS & WORKFLOW

- Git
- GitHub
- REST API
- Figma
- MCP Figma
- ChatGPT
- Codex

SOFT SKILLS

- Fast learner
- Teamwork
- Punctuality
- Meeting deadlines
- Attention to detail

AI TOOLS

- ChatGPT
- Codex
- Figma MCP

LANGUAGES

- Polish: Native
- English: B2

EDUCATION

Computer Science Engineering
WIT Academy in Warsaw

10.2021 - 03.2025

COMMERCIAL PROJECTS

Peach Store - Frontend Development / E-commerce

- Developed the frontend for Peach Store, a multilingual e-commerce platform for printer-related products
- Built the frontend part of the e-commerce platform from the beginning using React.
- Implemented responsive views, product-related sections and user interface components.
- Used Material UI to create consistent and reusable frontend elements.
- Connected frontend views with backend data provided by WordPress and WooCommerce.
- Supported multilingual implementation and language-based content structure.
- Worked with product data, dynamic content and e-commerce page requirements.

Tech stack: React, MUI, JavaScript / TypeScript, REST API, HTML, CSS / SCSS

 [Live Preview](#)

New House - Frontend Development / Migration Support

- Support frontend development for the New House website.
- Supported migration of selected frontend sections from PHP to React and TypeScript.
- Implemented responsive page sections, reusable components and UI improvements.
- Worked with existing layouts and adjusted them to match project requirements.
- Fixed frontend issues and improved consistency across selected parts of the application.

Tech stack: React, TypeScript, PHP, JavaScript, SCSS / CSS

 [Live Preview](#)

UDT - Joomla 5 Development / Template & Module Support

- Supported development and maintenance of a Joomla 5-based project, working mainly on template structure, modules, subpages and CMS-driven frontend implementation.
- Created and maintained Joomla 5 template elements.
- Built and configured custom modules.
- Implemented subpages based on provided layouts and content structure.
- Worked with custom fields, layouts and template overrides.

Tech stack: Joomla 5, PHP, HTML, CSS, JavaScript
